...

LOGistical is a large open-world, strategy, puzzle game where you transport different cargoes to complete all the towns throughout the country.

The whole game is a huge puzzle while each town is its own little piece of puzzling. There are over 1,000 towns to complete. Plenty of towns are easy enough. Some take complex planning. Do them in your own order. Get bonuses for completing regions and contracts.

Some cargoes are easy to get. Others you have to create in industries. Use existing industries and build your own.

The further you get from the start the more strategies you have to use.

Pimp up your trucks with bonuses. Last truck delivering gets the bonus.

The towns and map are to scale. Current or historical industry placement. You could even say that playing is educational.

There is plenty more to keep you on your toes.

Towns consume the cargoes you are trying to get to completion.

Big trucks are great for moving lots of stuff, but can't travel everywhere.

There are lots of broken roads that need deliveries.

Upgrade the industries for better exponential throughput.

Cargo stores can sure come in handy.

What! I can't take my big trucks across the water on a ferry.

... and what is with those quarantine checkpoints?

Complete towns, roads, industries, contracts, regions and states for lots of in-game and Steam achievements.

LOGistical's base game covers the whole of Australia including all the major cities, towns and industries. Start in Sydney and work your way through the different regions and states. Eventually covering coast to coast with the most difficult being across the sea to Tasmania.

the best game. Kudos, Skot.. Nostalgia Time

(Also you need to have V-Sync on or else you won't be able to jump). This is the true price to pay for power.

Faust is better for that though.. Pros:

Gaius Julius Caesar.

Seasons and Turns make sense in this DLC.

Delves a bit deeper than the base game into the gallic factions.

Fun to play, more immersive than the base game.

Cons:

Technology tree makes little sense, icons and buffs are strange.

Some path issues, funnelling a problem.

Overall: Second Best DLC you can own. Especially with all the new factions and units added.. I liked it. Nicer puzzles than most similar titles and they stick to the themes. It's about the puzzles not the plots.. Vandals is amazing! Great puzzles and nice atmosphere and soundtrack.. If you enjoy arena brawlers then you should enjoy this. Well polished fighting game. Maybe missing some game modes to really keep things fresh but I think most people just want deathmatch or team deathmatch regardless. You get the jist of the game just by watching some gameplay videos. There's not much more to it than just an arena brawler.

I'd say the only major flaw with this game right now is the low player base. Hopefully that changes over the next few days/weeks because it really is a fun game but it's hard to enjoy the game without thousands of different people to fight.. is fun but repetitive. Hi All,

Could you please do something to reduce the way of getting head-shots in the game. It looks like the game is broken when we talk about head-shots, it takes the fun away since, is very easy to get kill by a head-shot in the game.

A head-shot should be more rare

I hope to hear a respond from a developer. I believe many of H-Hours players will agree with that.

Thank you!!!

focuses on Rena's backstory with some action-packed scenes, and the power of friendship. Probably the worst game I've bought. I was glad to have gotten it for only \$0.50 on sale. Right now I can run Crysis 2 on high with DX11 on at full fps but this game lags like a benchmark running on a potato. I'm not the only person to complain about this. Perhaps if you fix it, it might be worth your time.. literally had 1 fps. Superbrothers seems to be a game for a certain audience.

From where I'm standing, it's got interesting visuals and decent music, but the narrative feels like a collection of tweets stuck together by gum and shoestring. Game is very pretentious and goes "ooh, so mysterious, we're not explaining anything, it's so confusing to you!" at every opportunity.

Ontop of that, the controls and UI are garbage. The controls seem to be designed for a touchscreen, and while that isn't too bad on it's own, they also use a lot of gestures that would not be comfortable with touch (and are annoying with M+KB) - you have to doubleclick to interact/walk up to, press and hold to guide the character, click and drag to move screen around and rightclick to open combat screen. WASD/arrows ARE used in the game, but only to move around the viewport.

UI does not help it at all, being full of slow, drawn out animations for everything, as well as being stylized to point of being unhelpful.

This game is not a good point&click adventure, it does not have a captivating story and it likes to talk down to you.

I can not recommend it.. Not so much a puzzle game, but just one puzzle repeated 50 times with microscopic variations. Time trial is a joke, it's just about remembering how to solve each level and executing the clicks as fast as you can.

I'd give a neutral rating because the game isn't bad. It's just not interesting.. I came, I saw, i touched derpy nudey people.

A attached rockets to them.

I attached rockets to whales, cars, dogs.

SCIENTISTS SAY: You should play this game.. I was quite surprised and emotional to see this old classic on Steam. I have played it many years ago. So of ocourse this was a must get for me.

The storyline is fun, graphics are decent, considered the age of the game. I am happy with it, Oh, and it also works out of the box with Steam Play!

This will cause me probably spending several hours in game during the next days.
